

EMERALD COAST UTILITIES AUTHORITY
BID 2014 05
HYDROFLUOSILICIC ACID

February 24, 2014

ADDENDUM NUMBER 1

Prospective Bidders:

This addendum is to notify you of questions that have been received relative to this bid and the answers that have been given.

1. Your specification demands that the minimum acceptable solution concentration for the HFS will be 23%. Therefore, we assume that any concentration solution lower than that will not be acceptable. Is this correct?

Yes.

2. Your specification and bid sheet allows for only one guaranteed price per gallon for the HFS with a minimum solution concentration of 23%. We assume that the guaranteed price would be the same even if the solution concentration delivered was occasionally slightly higher, i.e., you would not pay an upcharge for the stronger product. Is this correct?

Yes. We will reject anything other than what is requested in this bid

3. Under your insurance specifications, you failed to check off the Limited Pollution Liability, which covers third-party damages caused by accidental release and also provides for coverage for gradual releases. This type coverage is usually recommended for this type of hazardous product. Do you want to include this coverage as part of your requirement?

No. Please note that full Pollution/Environmental Impairment Liability Coverage is required.

If you have any questions, please call my office at 850-969-6531, or email me at amy.williamson@ecua.fl.gov.

Regards,

Amy Williamson, CPPB, FCCM
